

# AllsystemsMax PRO Starter Version

The Starter Version is ideal for the budget conscious small repair shop that does **not need** the following features found in the full version:

## 1. Contact Manager tab

What is the Contact Manager tab? The Contact Manager in AllsystemsMax helps you increase your average yearly sales per customer. It helps you retain existing customers by making regular communication with your customers easier.

## 2. Multi-Company

Management of multiple companies not included.

## 3. Multi-User

Multiple workstations not included.

#### 4. Time Clock

Tracking employee hours by simulated punch in and out time clock is not included. Use billed hours or adjusted billed hours ('tech hours') instead.

#### 5. Emailing

Email as PDF button (red arrow below), which simplifies emailing estimates, repair orders, invoices and other documents to your customers, is not included. Instead you use the Save to PDF button (green arrow below) and then manually attach them to emails managed in gmail or other emailing software of your choice.
