

# AllsystemsMax Cloud Pricing

10-25-2018

Choose 1 configuration:

1. Remote Servers (AWS, Azure, Other).

No setup required. Reliable Internet connection required. No need to maintain networking or computers.

2. Local Server

We create a local cloud server, accessible by either wi-fi or internet, on your Windows 10 computer (minimum i5, 8 GB Ram, 256 GB SSD), and router. Recommended for locations with unreliable or no internet, as well as those desiring greater independence as well as total control of their data.

Both configurations include AllsystemsMax Prosoftware license and login credentials, setup and installation, as well as automatic off site backup. For local server, backup is to your own Dropbox or other cloud storage. Customer provides their own browser-enabled devices: computers, laptops, tablets (minimum 8”), Windows, Chrome, Android

## Pricing

	Base Price* 3 users	Support ** (required)		Additional user licenses (optional)
Cloud	\$990.00	\$69/month (required)		\$20/month each
Local Cloud	\$1,450.00	\$89/month (required)		\$20/month each
Unlimited Texting	included	included		

\* One time fee. Non-refundable after first 30 days.

\*\* Unlimited Technical Training and Support. Required after first 30 days. Non-payment voids your license to use the software, triggers forfeiture of your purchase. Tech support requests are submitted by text for quickest response. Includes automatic updates.
